Professional Summary

Junior Full-Stack Web Developer with experience in developing web and mobile applications using Angular, TypeScript, and modern front-end technologies.
Focused on creating scalable, optimized interfaces designed with the user experience in mind.

Hard Skills

- Frontend: Angular, React, TypeScript, JavaScript, HTML, CSS, SASS
- Backend: Node.js, Express
- Databases: SQL, Supabase, MongoDB
- Tools: Git, GitHub, Ionic, Capacitor
- Additional Technologies: Python, PHP, Java, C#

Soft Skills

- Problem Solving
- Teamwork
- Time Management

Work Experience

Falluto – 2025 / Present

- Developed frontend interfaces for a browser-based multiplayer party game.
- Implemented screens, reusable components, and visual logic using Angular and TypeScript.
- Developed a responsive system optimized for mobile devices.
- Implemented multilingual internationalization and persistent settings.
- Optimized user experience, animations, and frontend performance.
- Participated in real-time system integration and multiplayer room flow.

TasteByte Mobile – April 2025 / December 2025

Academic project associated with Universidad Tecnológica Nacional (UTN)

- Developed a mobile app for restaurant management using Angular, Ionic, and TypeScript.
- Implemented a multi-role system for customers, servers, kitchen staff, delivery personnel, and administration.
- Developed real-time features using Supabase Realtime.
- Integrated authentication, database, and real-time synchronization.
- Implementation of order management, table assignment via QR codes, and status tracking.
- Developed a delivery system with geolocation and shift scheduling.
- Created administrative dashboards, statistics, and billing generation features.
- Optimized the mobile experience and scalable modular architecture.

Auto Parts Sales Representative – 2018 / Present

- Responsible for product marketing and customer service.
- Managed global stock monitoring and inventory control.
- Optimized inventory using automated Excel spreadsheets.
- Handled invoicing and logistics coordination.

Academic Studies

- Associate Degree in Programming, UTN – March 2023 / December 2025
Degree focused on web development and databases, including Angular, React, Node.js, and SQL.
- CoderHouse Certificates:
 - Backend Programming – December 2021 / June 2022
Introduction to backend development with Node.js, Express, and relational databases.
 - React JS – October 2020 / November 2021
Development of dynamic interfaces with components, states, and API integration in React.
 - JavaScript – August 2020 / October 2020
Problem-solving and programming logic applied to web development with JavaScript.
 - Web Development – June 2019 / August 2019
Training in web layout with HTML, CSS, and SASS, focused on best practices and semantic structure.
- High School Diploma in Economics and Business Administration – 2012 / 2017
Secondary education with a focus on business administration, accounting, and business organization.
